Wairarapa Organics

Wairarapa Organics was formed mid-2000 by a group of Wairarapa growers, retailers and consumers. This group recognised the need to improve access to the knowledge and skills necessary for successful organic food production and marketing. Equally important, Wairarapa Organics aims to convincingly present the benefits of organic products to the people of the Wairarapa. Wairarapa Organics is a non-profit Incorporated Society.

In the light of BSE, genetic engineering and other food scares, as well as general health and environmental concerns, demands for organic products is growing at a breathtaking speed. It is currently growing faster than any other market in the world – including the software market. This trend represents a major economic opportunity for the Wairarapa and other New Zealand regions.

Aims of Wairarapa Organics

- ◇ To promote, encourage and support activities which will increase the level of organic production, marketing and consumption in the Wairarapa region.
- ◇ To collect and disseminate information on subjects of interest to existing and future organic producers, consumers and other interested parties.
- ◇ To actively seek the support of both Governmental and non Governmental organisations which can assist the Society to meet its goals.
- ◇ To assist individuals and corporate bodies to meet their goals in relation to organic production, marketing and consumption.
